

# DATA DISTRIBUTION SYSTEM

BY

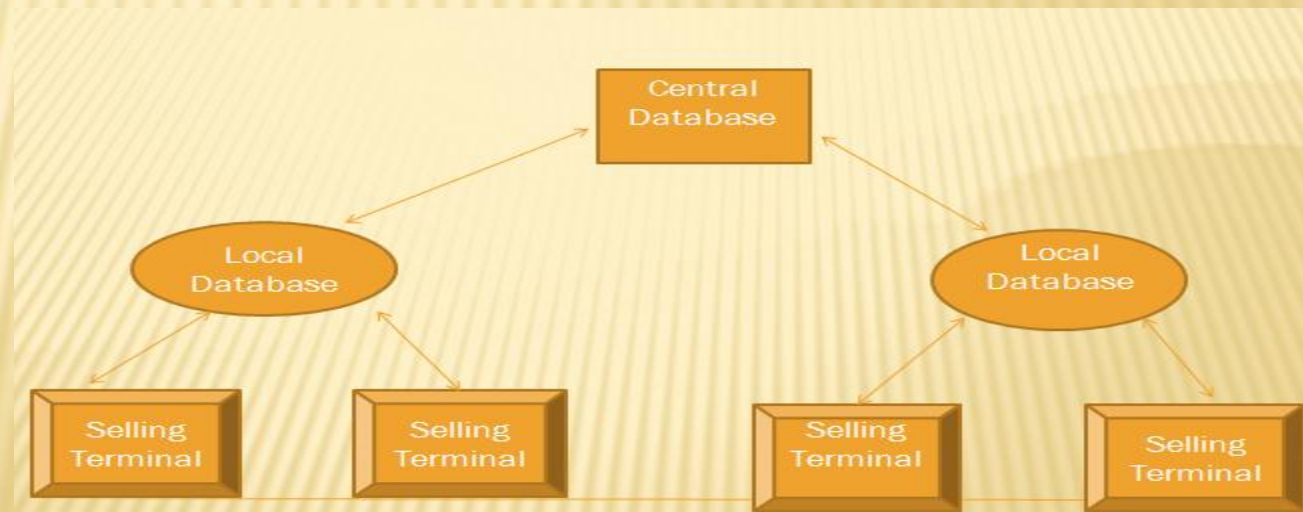

PULANE MILLICENT MOLEBALE

---

Supervisor: Mr James Connan

# PROJECT OVERVIEW

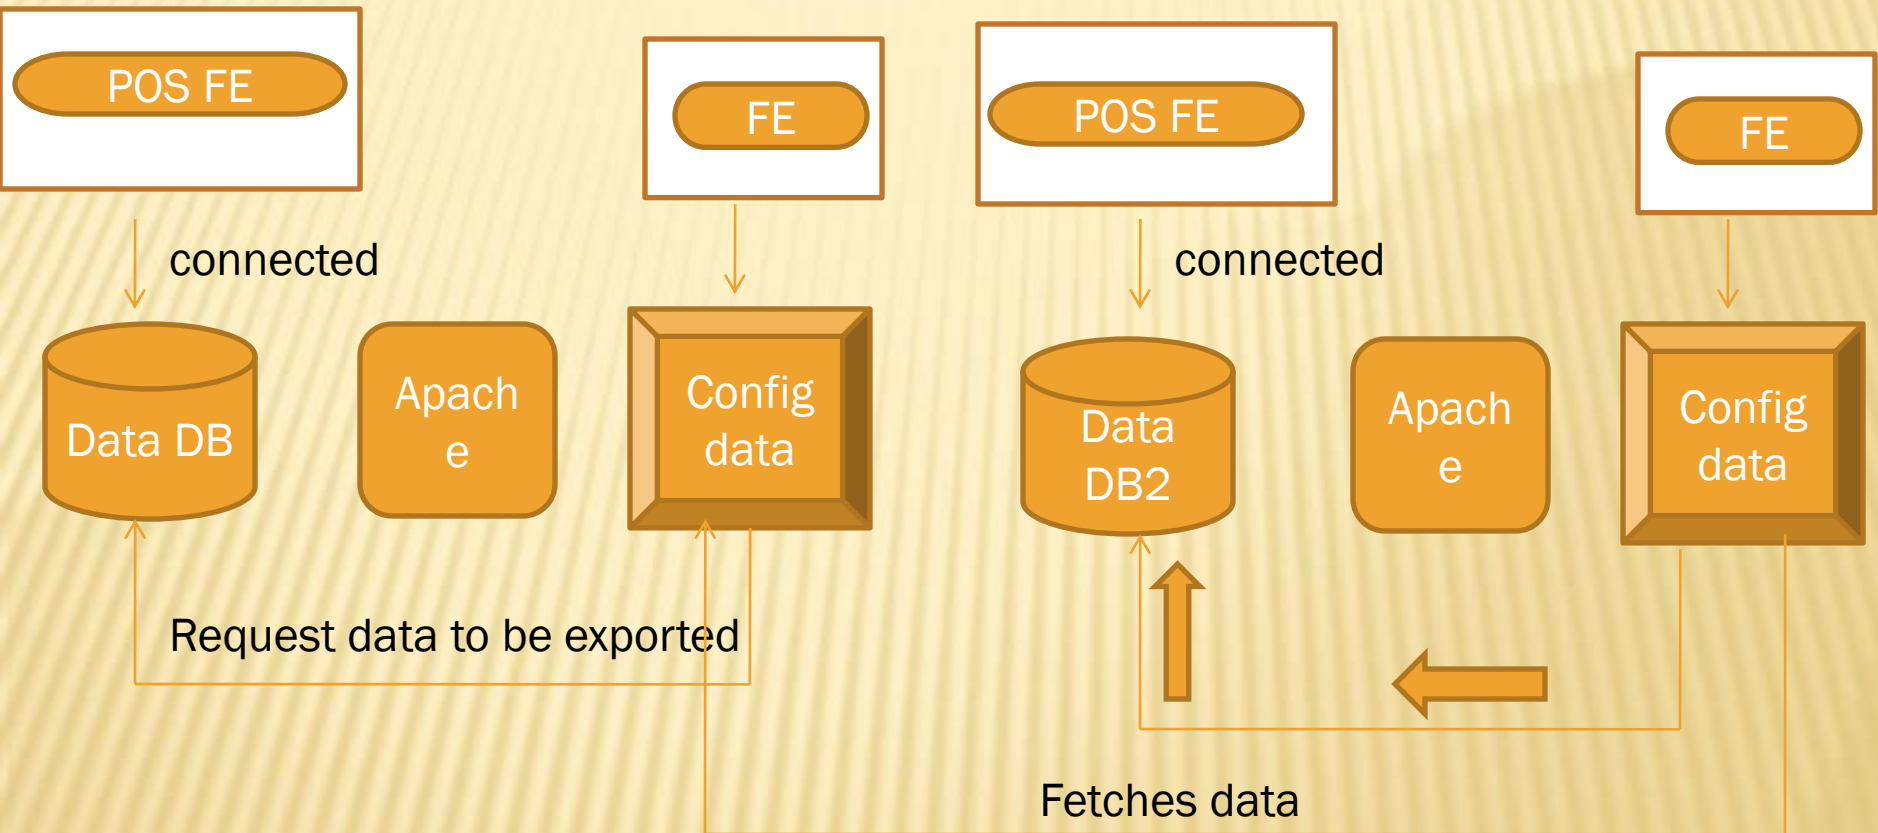

- ❖ An application that perform a collection of procedures to manipulate actions of multiple processes on a network.

# CURRENT STATE OPERATION

- ❖ Current user
  - Can monitor who is currently doing the transaction
- ❖ Nncron application
  - Scheduling tasks
  - Display messages into a text file and a log file
- ❖ Synchronization
  - Done periodically on fixed time

# CURRENT STATE OPERATION CONT.

# CHANGES

---

- ❖ User interface specification
  - Made it to look more like a cash register rather than a web based registers
- ❖ High level design
  - More classes were added
- ❖ Low level design
- ❖ Synchronisation
  - From doing it manually now it automatically updates the system
