

# FINGERPRINT RECOGNITION

COMPILED AND PRESENTED

BY

MANGALISO SIPAMLA

SUPERVISOR

: MR A ISMAIL

# A BRIEF DESCRIPTION OF THE SYSTEM

Produce a fingerprint recognition system to be used by the University of the Western Cape

- Current system

- Proposed System

# TOOLS USED

- Java for programming.

- Fingerprint Scanner

- Terminal

# TESTING

- Functionality testing
  - System traces back to the requirements
  - Unit testing
  
- Usability testing
  - Participants were the honours students of the Computer Science department
  - The system was explained to each participants
  - Users went through the process of getting their fingerprints scanned to matching
  - Short questionnaire was issued to the participants to gain some feedback.

# TESTING

If the system was proposed to be introduced, would you vote for it to be used?

Easy to use.  
Easy to learn  
Not time consuming.  
Engaging.

# TESTING

Do you feel like the system traces back to the user requirements?

Efficient  
Effective
